a total lighting renovation provider.....

lighting renovation options

- **Retrofit** - lamps, ballasts and reflectors, lenses or louvers are replaced, without predictable improvements of lighting distribution
- **Relight** - upgrading internal fixture components with relight assembly. This light engine is a replacement of lamps, ballasts and all light distribution surfaces within the existing fixture shell, resulting in predictable, enhanced lighting quality and aesthetics
- **Replace** - one-to-one replacement of the entire existing luminaire with a completely new luminaire that offers enhanced performance
- **Redesign** - completely redesigning the lighting scheme to optimize performance, resulting in new luminaires located in different locations

product and controls solutions

broad portfolio of energy-efficient products to ensure you achieve your energy and lighting objectives

- Innovative indoor and outdoor lighting and controls
- Custom and high-speed manufacturing
- Rapid-response product delivery system

resources and expertise

expansive knowledge, experience, product training, information delivery and sales assistance

- Dedicated, professional lighting renovation experience

experience and commitment

a partner you can count on – now and in the future
Acuity Brands is committed to serving customer needs before, during and after the sale. While many renovation companies come and go, you can rest assured that we will be there to support your long-term lighting needs. We have renovated the lighting in more than 10,000 facilities.

innovative products optimized for your application.....

with leading product brands such as Lithonia Lighting®, MetalOptics® and Sensor Switch®, **Acuity Brands delivers customized controls and renovations strategies for these applications and more. Visit our website to view client success stories.**

offices

An office lighting renovation can significantly enhance the visual environment, providing comfortable light that enhances productivity. Acuity Brands offers innovative, energy-saving office solutions in fluorescent and LED direct/indirect lighting, downlighting and lighting controls.

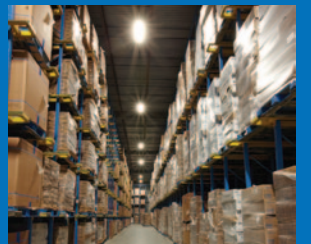

industrial

Industrial environments range from heavy manufacturing to cold-storage facilities, where high- and low-ambient temperatures can significantly impact lighting performance. Acuity Brands offers a variety of energy-efficient industrial lighting solutions, including rough service and security lighting.

warehouse/distribution

Acuity Brands offers a broad array of energy-efficient high bay fluorescent and HID lighting solutions designed to maximize horizontal and vertical illumination in aisles, reducing picking errors and improving safety.

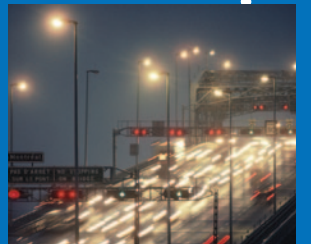

retail

Energy-efficient retail lighting solutions must optimize visual comfort and maximize merchandising effectiveness in both small and spacious environments. Acuity Brands offers multiple fluorescent luminaires and energy-efficient downlighting for interiors and outdoor HID for parking area safety.

education/healthcare

From lighting controls and LED ambient lighting to fluorescent direct and indirect suspended lighting, Acuity Brands offers a wide variety of innovative products that reduce energy and optimize environments for learning and healthcare.

outdoor/street lighting

Acuity Brands is a leader in providing environmentally sensitive outdoor lighting and streetlight systems.
